

Lower-Limb Motion Estimation

Modelling the Kinematics of the Human Lower-Limbs using
Cameras and an IMU

Prepared by:

Johann Hendrik Joosten

Department of Electrical and Electronics Engineering
University of Cape Town

Prepared for:

Dr. Amir Patel

Department of Electrical and Electronics Engineering
University of Cape Town

Submitted to the Department of Electrical Engineering at the University of Cape Town
in partial fulfilment of the academic requirements for a Bachelor of Science degree in
Mechatronics.

Title

Lower-Limb Motion Estimation - Modelling the Kinematics of the Human Lower-Limbs using Cameras and an IMU.

Description

Recent breakthroughs in the field of artificial intelligence has invigorated the pursuit of humanoid robots. Unfortunately, modern bipedal robots lack the elegance of motion and fluidity observed in nature. Perhaps then a modern take on the lower limb kinematics of humans could provide insight to the field of bio-inspired robotics. By using modern cameras with miniature footprints and accurate sensors data capture systems can be transferred onto the subjects in question. This methodology allows for a much larger spectrum of motion capture and can greatly improve our understanding of motion in the unconstrained real world.

Deliverables

The following items have been identified as critical deliverables for the project:

- Functional harness to hold Electronics
- data capture equipment
- estimation algorithm
- kinematic model of the human lower limbs
- computer vision algorithm (!?)

Skills and Requirements

Mechanical Design, Electrical Design, Programming and Modelling.

Area

Computer Vision, Sensors, Biomechanics and Bio-inspired Robotics.

Declaration

1. I know that plagiarism is wrong. Plagiarism is to use another's work and pretend that it is one's own.
2. I have used the IEEE convention for citation and referencing. Each contribution to, and quotation in, this report from the work(s) of other people has been attributed, and has been cited and referenced.
3. This report is my own work.
4. I have not allowed, and will not allow, anyone to copy my work with the intention of passing it off as their own work or part thereof.
